EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Edwin Flores on November 7, 2003.

The application has been amended as follows:

The Claims:

In claim 1, line 2, delete "100,00" and insert --100,000 --.

In claim 22, line 2, delete "100,00" and insert -- 100,000 --.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Note that, Applicant's amendment, Applicant's arguments, and the Examiner's Amendment are sufficient to place the instant claims in condition for allowance.

Of the references of record, the most pertinent are DeSimone et al (DeSimone et al (US 5,866,005) and Schlenker et al (US 5,269,815).

DeSimone et al teach a process for separating a contaminant from a substrate that carries the contaminant. Specifically, the process comprises contacting the substrate to a carbon dioxide fluid which contains an amphiphilic species. As a result the contaminant associates with the amphiphilic species and becomes entrained in the carbon dioxide fluid. See column 2, lines 25-35.

Schlenker et al teach a process for the fluorescent whitening of hydrophobic textile materials, especially polyesters, wherein the textile material is treated with with disperse fluorescent whitening agents in supercritical CO₂. The fluorescent whitening agents used in the process are water-insoluble compounds containing two identical or different radicals. See column 1, lines 60-69. Note that, Schlenker et al provides no motivation to use a hydrophilic fluorescer in the composition as taught by DeSimone et al.

None of the references of record, alone or in combination, teach or suggest a dry cleaning composition containing densified carbon dioxide, a polar solvent, a hydrophilic fluorescer and the other requisite components of the composition in the specific proportions as recited by the instant claims. Accordingly, since the prior art fails to teach or suggest such a composition as recited by the instant claims, the instant claims are deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
